

Regain Your Independence

*Primer sold separately

Primer PC

If you find yourself isolated by low vision problems like Macular Degeneration, our products will help you achieve self-sufficiency!

Add the versatility and flexibility of PC compatibility to your Primer™. Now you can use our popular Primer™ with any PC, or PC Laptop computer via its' USB (Universal Serial Bus) port.

- **No external power supply necessary**
- **Extra magnification through software**
- **Split screen with any Windows program**
- **Compatible with Zoom Text**
- **Connects via computer USB port**

Perfect for school or business and fully powered by your computer, simply roll Primer's hand held camera over the page of a book, or any other object regardless of shape and it will automatically focus the text onto your PC's monitor.

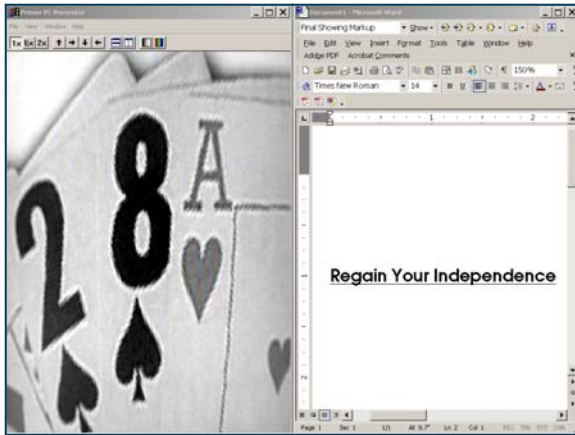

The size of the image is easily selectable between a custom-sized window, a half-screen split and full screen. While reading, you can continue to use the computer for other tasks, and PC Primer is compatible with screen magnification software like ZoomText™.

School children in particular have successfully used our PC adapters to read course notes at their desk, while moving from class to class with a laptop or by using classroom computers.

At only \$195 this is a great accessory to extend the usefulness of our popular Primer.

Call us toll free today at 800-854-6554 for specifics and a "NO STRINGS ATTACHED" "FREE" trial.
